ClearCaster

Purpose built hardware. Bulletproof streaming meetings.

WOWZA media systems

Bring streaming meetings into the future

As the industry leader in streaming public meetings, Granicus is constantly looking to improve the streaming experience.

That's why we're introducing ClearCaster. ClearCaster delivers the highest levels of reliability and modern capabilities to future-proof your public meetings.

Combining Granicus' industry-leading streaming software with Wowza's enterprise-class hardware encoding device delivers a bulletproof solution and modern features like simulcasting and 4K streaming. All with the robust security you've come to expect.

Modernize your streaming and virtual public meetings with the new ClearCaster encoder and Live Cast streaming software.
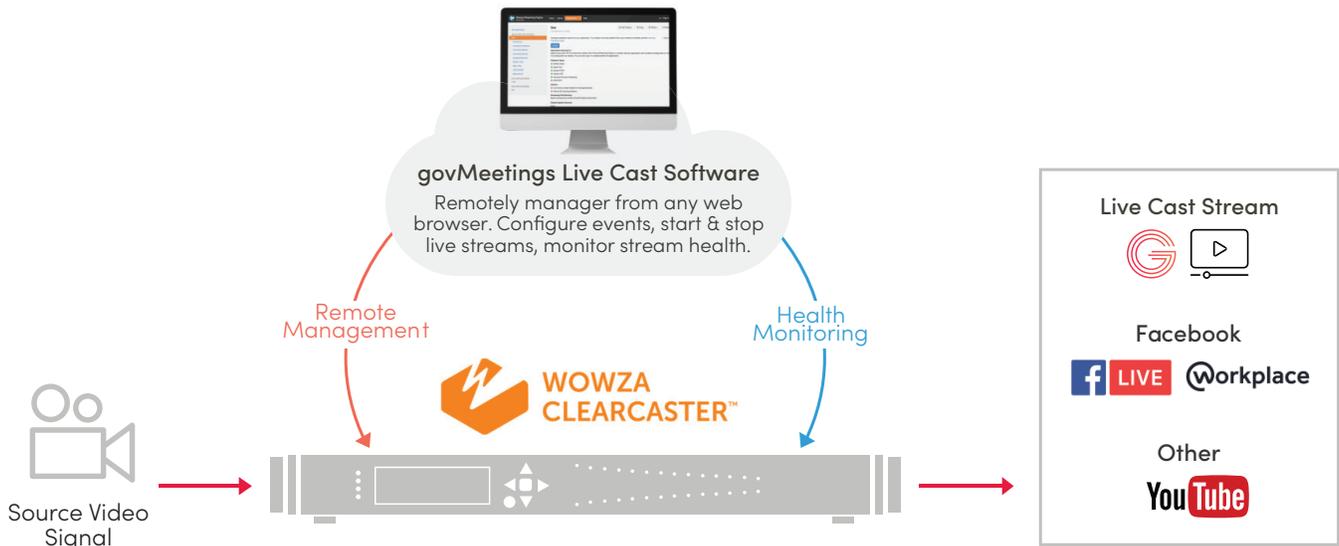

Key Benefits

Deliver reliable video streams to the public and staff	**Improve reach** to better engage your community
Run high-quality meetings from anywhere, on any device	**Strengthen cybersecurity** and protect data

---

ClearCaster powers modern streaming technology...

✔ 100% cloud-based controls power virtual and hybrid meetings.

✔ Streaming to multiple platforms like YouTube and Facebook for increased reach and redundancy.

✔ Layered security measures, including encryption of incoming and outgoing streams*.

✔ Real-time health monitoring and adaptive bitrate for improved end-user reliability*.

Features to be added at a future date

govMeetings Live Cast Software
Remotely manager from any web browser. Configure events, start & stop live streams, monitor stream health.
