

CivicaCMS

Beautiful websites – no coding required

A CivicaCMS website is a modern and beautiful digital representation of your city that you can be proud of, without requiring a technical team.

Over the past 20 years, more than 300 government organizations have launched new, easy-to-use CivicaCMS websites, making Granicus a premier website provider for local governments and special districts. The secret to our award-winning technologies is a collaborative and user-focused approach to design and development that ensures your website works for your city and your citizens.

In addition to being beautiful and fun to interact with, Granicus websites are functional and mobile responsive. To meet a growing demand for online accessibility, Granicus partners with Siteimprove, an industry leader in accessibility that allows CivicaCMS to meet ADA standards.

Civica websites also integrate with a full suite of government technology solutions from Granicus, giving local government staff from clerks to communicators easy-to-use tools to more productively and powerfully interact with citizens.

Clean, modern, custom design

Built with citizen navigation in mind

Simple backend management with no coding required

Robust user roles and permissions

Mobile responsive & ADA compliant

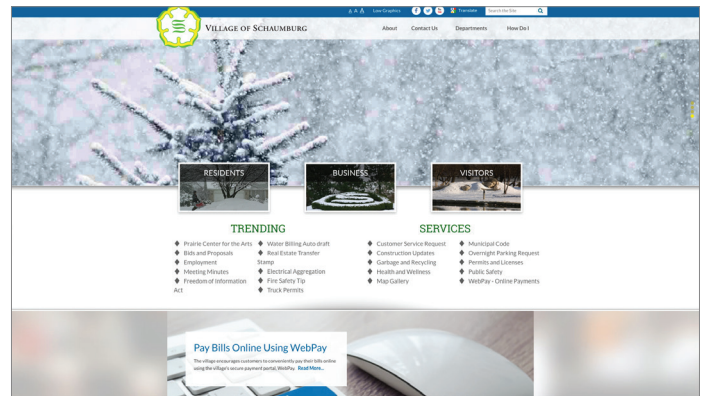

Secure hosting with 99.9% uptime guarantee per month
