

# eUniversa

## Electronic filing for court cases

eUniversa streamlines e-filing services for courts, allowing for remote filing of single documents as well as submission of multiple claims and documents for more-complicated court cases. Through integration with all major case management systems, court administrators and clerks can easily review and approve submissions and automatically route and docket documents.

eUniversa is easy to use, performs well in both simple and complex environments

and offers a multi-vendor model. Through compliance with OASIS XML Electronic Court Filing (ECF) 4.01 standards, eUniversa allows for validation of case numbers, case information and document retrieval, automated online submissions and more. This ensures that courts of all sizes are able to fully integrate, optimize and implement the most effective process to allow for faster turnaround of court documents.

Court document e-filing remotely

Digital review and approval workflow

Integrates with all major case management systems

Serves courts of all sizes

Complies with ECF 4.01 standards

Centralized registration for filers using the system
